

The best
source
of nutrients!

SUGAR

3 - 0 - 7

New type Fertilizer, EU licenced.

COMPOSITION

Total nitrogen 3% w/w

Total potassium 7% w/w

Polysaccharides 10% w/w

Activate the ground of your cultivation!

- Improves soil microbial activity.
- Increases organic matter content.
- Increases absorption capacity of the elements and reduces the negative effects of salinity and abiotic stresses.
- It activates the microflora of the soil and improves its physical structure.

SUGAR

Liquid organic soil improver based on polysaccharides, 100% plant origin
with selected polysaccharides, enriched with betaine
that improve plant stress tolerance.

HOW TO APPLY:

Apply through irrigation system
and foliar application.

INSTRUCTIONS FOR USE:

Always add water to the tank halfway through
then SUGAR in the spray tank, mix well and
add water up to the desired volume.
When applying only SUGAR, a non-ionic
surfactant should be pre-installed to achieve
maximum coverage in the crop.
Shake well before use.

| | APPLICATION RATES | RECOMMENDED APPLICATION |
|--------------------------|--|---|
| TREES | 10-40 l / ha (soil application) | Vegetative recovery: Repeat in case of chlorosis or stress. |
| OUTDOOR VEGETABLES | 25-30 l / ha (soil application) | After transplanting. Repeat every 15-20 days. |
| GREENHOUSE VEGETABLES | 2-3lt / 1000lt (foliar) 25 - 30 l / ha (soil application) | (dose per application) After sterilization of the soil every 15-20 days. |
| INDUSTRIAL PLANTS | 25-30 l / ha (soil application) | After transplanting. Every 15-20 days. |
| CEREALS | 5-10 lt / ha (soil application) | In combination with herbicides and fungicides. |
| PLANTS AND NURSERIES | 2-3lt / 1000lt (foliar application) | (dose per application) In transplantation, repeat every 15-20 days. |
| ORNAMENTALS | 2-3lt / 1000lt (foliar application) | (dose per application) During transplanting or after pruning. Repeat every 15-20 days. |
